CARINA Junior

Design it on your own!

With the Carina Junior, learning sewing is very easy. The machine offers the most important functions for optimal sewing results and is therefore the ideal entry-level model. It is easy to use thanks to the single dial system. Even buttonholes are absolutely no problem with this machine. Thanks to the automatic buttonhole, the work step can be carried out without much effort. Even more complex projects can be sewn easily thanks to the powerful 70 watt motor. With the glare-free LED sewing light you will always have a good view of the work process. Sewing utensils can be stored properly and clearly in the accessory box. Even the stitch width and length can be infinitely adjusted as desired. So that sewing work can also be sewn flawlessly, there is a reverse sewing button on the Carina Junior with which this process can be carried out immediately. Furthermore, the included accessories enable an efficient way of working. The Carina Junior is particularly popular with young audiences, as it can be designed as you like with the included stickers.
